AGS Client Testimonials

// We transferred our ISO registration to AGS creating a three-year savings of \$9950 on fees, plus outside auditors' expenses for travel, hotel rooms and meals."

– *Greg P. Design*
Manufacture & Distribution of Pre-Cast Concrete Products

// Having ISO certification is a big step for me to move forward and to grow. I am getting into the higher-end type of customer and an ISO-9001 certification will be an advantage that I will have over my competition. Thanks again...for everything. Your time, efforts, and most of all, your patience has been stellar."

– *Patrick M., Metal Fabrication*

// I am not only impressed that you responded so quickly, but that you trusted—that with some amendments—we would be in conformance with the ISO Standard. When others used to come and audit us each year, it would take at least four to six weeks to even get our certificate and that was with a lot of pushing. It was refreshing to feel like a valued customer."

– *Donna M., Products for Commercial Construction*

// I just received the ISO flag you sent to us. It is absolutely GREAT!! Thank you so much. We will fly it with pride and hopefully others will see it and change to your company for their certification. We are pleased with American Global Standards and also enjoyed working with you."

– *Wilma B., Packaging & Assembly of Fastener Kits*

// Great Experience! Thank you! I wasn't even expecting our certificates so soon. I am pleasantly surprised at the ease of service with American Global Standards!"

– *Kimberly D., Manufacture of Metal Products*
